### About Me

Passionate frontend developer with hands-on experience in building interactive, user-friendly, and responsive web applications. I actively design and develop projects using **React** (frontend) and **Django** (backend), showcasing strong skills in modern web technologies, UI/UX, and problem-solving.

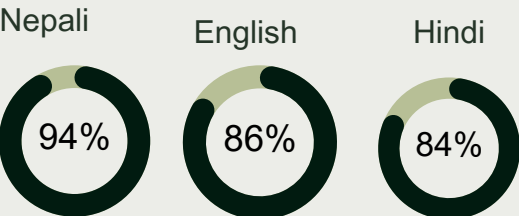

### Skills:

React.js	●●●●●●
JavaScript (ES6+)	●●●●●●
HTML5 / CSS3	●●●●●●
Django	●●●●●●
Git & GitHub	●●●●●●

### Education:

- Bachelor of Information Technology  
At Padma Kanya Campus  
Expected Graduation: 2026

### Language:

### Academic Projects

#### Full-Stack E-Commerce Web Application

- Developed a complete online shopping platform with React and Django.
- Features: 🔒 User authentication, 🛒 Product listing & details, 📁 Cart system, 💳 Checkout flow.
- Implemented responsive UI and seamless state management.
- Currently adding PWA support, product reviews, order tracking, and AI-powered recommendations.

#### Online Café Search Project

- Built a café/restaurant search application using React and integrated a third-party API for real-time data.
- Implemented search filters and location-based results for a smooth user experience.
- Focused on fetching, managing, and displaying API data effectively with responsive UI.
- Strengthened skills in REST API integration, async JavaScript, and user-centric design.

### Strength:

- 🔧 Proficient in React.js
- 🧠 API Integration
- 🎓 Full-Stack Knowledge
- 📁 Version Control (Git & GitHub)
- 🔍 Problem-Solving & Debugging

### Movie Search Website

- Developed a React-based web application that allows users to search for movies in real-time using an external Movies API (e.g., TMDB/OMDb).
- Implemented dynamic search with instant suggestions and detailed result pages including title, poster, release year, genre, and rating.
- Added filtering features (by genre, release date, popularity, etc.) to improve user experience.
- Designed a responsive, minimal UI for smooth browsing on both desktop and mobile.
- Strengthened skills in API data fetching, state management, error handling, and conditional rendering for loading states & invalid searches.
